INTRODUCING

VANTEC'S TOTAL CARE PACKAGE

Vantec RV Care is excited to introduce our Total Care Package to the world of RV's.

Drawing on Vantec's long history of helping owners maintain their RV's we have created this package that will help keep the exterior and interior of your RV looking better for longer. The first step in our Total Care Package is the application of our industry leading ceramic coating to the exterior of your RV.

Our outstanding Total Care Package also consists of complimentary cleaning products to make the job of maintaining your RV even easier, a Total Care Cleaning Guide, a 5 year warranty on any new RV or a 2 year warranty on any RV under 12 months of age. We also give you a two year membership to Kui Parks where you receive a discount at over 65 amazing parks around Australia.

Our Vantec warranty applies only where you follow the Total Care Package.

Why not invest in your amazing RV today by finding out more about our fantastic Total Care Package. Please see below to contact our friendly team who would love to assist you.

Advanced SiC Composition

Vantec's exterior ceramic coatings represents the latest in RV Protection. The addition of Silicon Carbide and the state of the art Nano Technology within Vantec Coating provides superior bonding of the solution down to a molecular level.

Interior

Whether its leather, leatherette or fabric Vantec Interior Coating will provide total protection from dirt, food and drink spillages whilst reducing fading from ultra-violet rays.

Low Maintenance

Caring for your RV has never been easier with all the benefits that Vantec Coating offers. Protect your pride and joy with only the finest Surface Coating.

Hydrophobic

The molecular make-up of Vantec Coating causes water to form a spherical shape, minimising the overall contact to the surface and simply rolls off. This makes cleaning a hydrophobic surface much easier.

Enhanced Gloss

Nano Technology allows Vantec Ceramic Coating to fill all microfine imperfections on treated exterior surfaces, reducing light refraction and creating an undistorted and unmatched gloss to the exterior surface in a single application.
